

KOTA VENKATA SAI MOHAN

Aspiring AI Engineer | B.Tech CSE (AI & ML)

Visakhapatnam, Andhra Pradesh • +91 9861288491 • saikotamohan@gmail.com • linkedin.com/in/sai-mohan • github.com/saimohan

PROFESSIONAL SUMMARY

Motivated 2nd-year B.Tech Computer Science & Engineering (AI & ML) student at GITAM University with strong foundational expertise in Python, Data Structures, and Applied Machine Learning. Demonstrates hands-on competency in Natural Language Processing (NLP) workflows, end-to-end data preprocessing pipelines, and interactive deployment using Streamlit. Seeking an **AI Engineering Internship** to contribute to scalable model implementation and production-grade intelligent solutions.

EDUCATION

GITAM (Deemed to be University)

Visakhapatnam, India

Bachelor of Technology in Computer Science and Engineering (AIML)

Expected 2028 | 2nd Year

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Linear Algebra, Probability & Statistics, Machine Learning Foundations, Database Management Systems (DBMS).

TECHNICAL SKILLS

Languages: Python, C++, SQL

AI / ML & NLP: Scikit-Learn, Pandas, NumPy, NLTK, spaCy, TF-IDF Vectorization, Cosine Similarity

Tools & Frameworks: Streamlit, Git, GitHub, VS Code, Jupyter Notebook

Core Competencies: Natural Language Processing (NLP), Data Cleaning, Feature Engineering, Supervised Learning, Model Evaluation

PROJECTS

AI Resume Analyzer & Matcher

Python

NLP

Scikit-Learn

Streamlit

- Engineered an intelligent NLP-based candidate resume evaluation tool that parses documents against job descriptions to quantify profile compatibility.
- Developed an automated text processing pipeline using regex and NLTK for tokenization, punctuation removal, lowercasing, and lemmatization.
- Employed TF-IDF vectorization and Cosine Similarity algorithms to compute similarity metrics, matching scores, and identify key missing skill requirements.
- Built an interactive, user-friendly Streamlit web interface supporting instant multi-format PDF upload, data extraction, and visual score reporting.

Predictive Machine Learning Classifier

Python

Pandas

Scikit-Learn

Data Analysis

- Implemented exploratory data analysis (EDA) and data preprocessing on structured datasets, managing missing values, outlier detection, and feature scaling.
- Trained and benchmarked baseline classification algorithms (Logistic Regression, Decision Trees, and Random Forests) using Scikit-Learn.
- Evaluated cross-validation metrics and optimized prediction accuracy through hyperparameter tuning, tracking Accuracy, Precision, Recall, and F1-Score.

CERTIFICATIONS & CO-CURRICULAR ACTIVITIES

- **Technical Coursework:** Applied Machine Learning & Python Data Science Foundations (self-study and academic projects).
- **Hackathons & Workshops:** Actively involved in technical events, coding workshops, and AI seminars organized at GITAM University.
- **Problem Solving:** Practicing data structures and core algorithm challenges on LeetCode and HackerRank.
